"optimal service at reasonable cost"

Optimal service at reasonable cost

- How do we manage it....in Buren
 - Municipalities gain more and more tasks
 - We don't have the specialists
 - Systems are more complex
 - We can't continue like this...
- You can't do it without an open architecture and open data

"Open your mind, don't fear"

Open Government, The Dutch approach

We have to look at our information systems

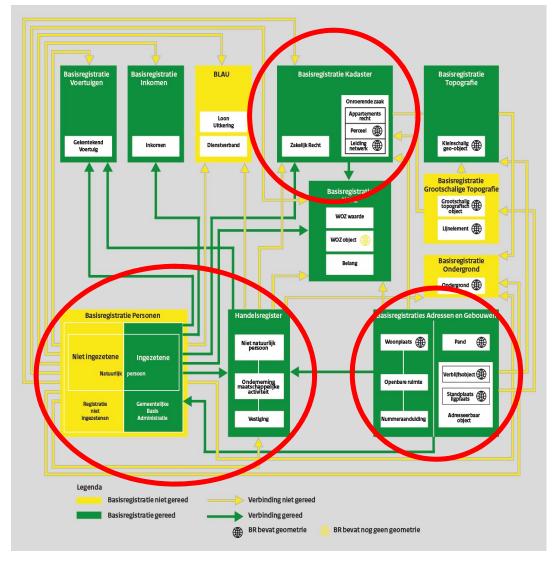

- Dutch government reference architecture (NORA)
 - Data
 - System
 - Proces

Data

Information model

Basic registration system

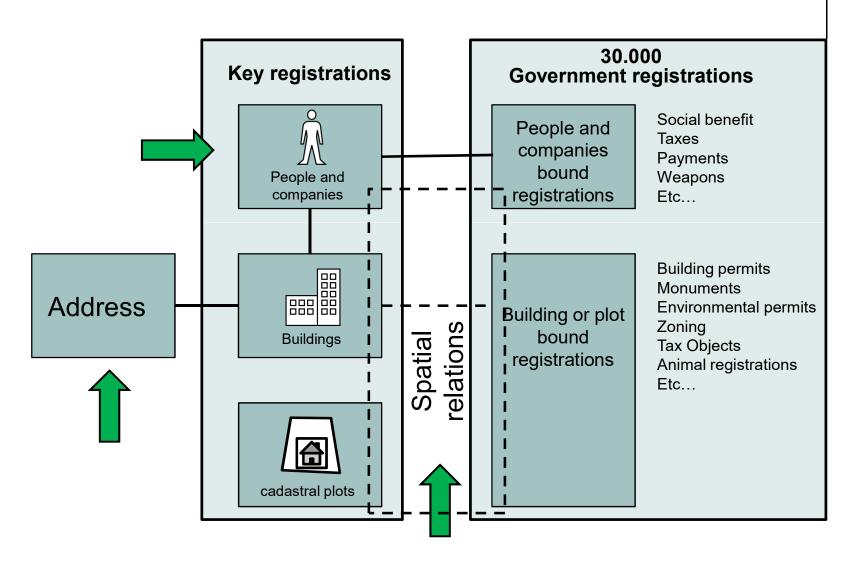

Basic registration system

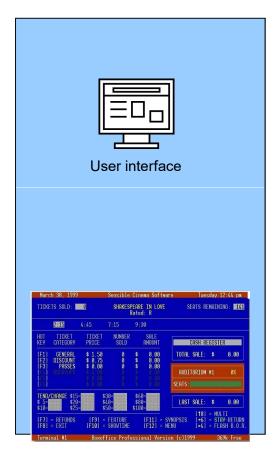

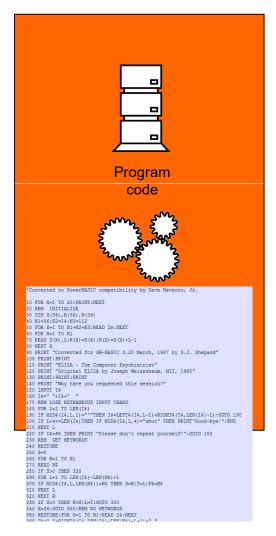

SYSTEM

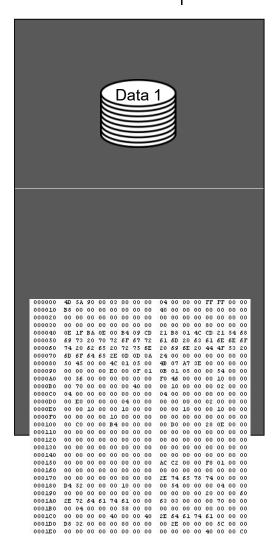

INTERFACE The user interface

LOGICA The program

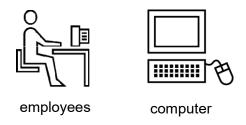

DATA The data

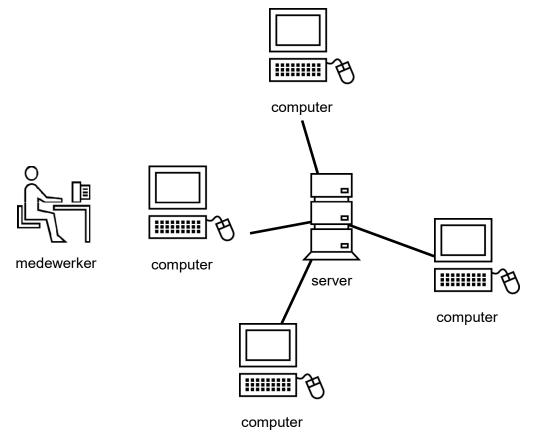

The eighties

All the components of the informationsystem interface, logic and data on one computer

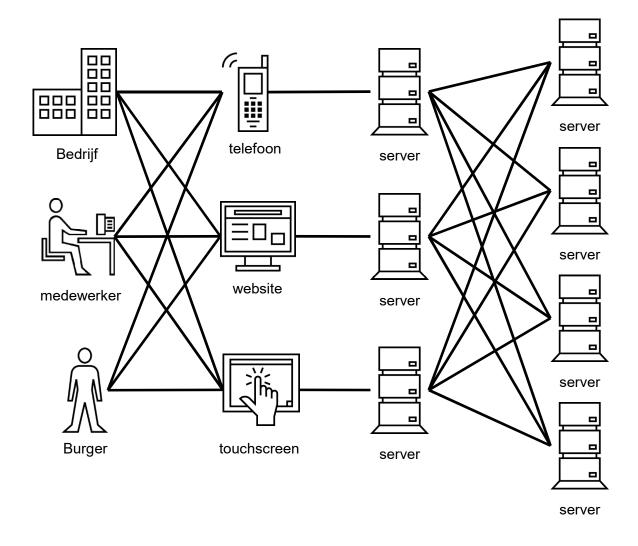

The nineties

interface, logic and data on one LAN

NOW!

All parts are spread across the Internet

Proces

Public space complaints

call center

Open Government The Dutch approach

- Dutch government reference architecture (NORA)
 - Data
 - System
 - Proces

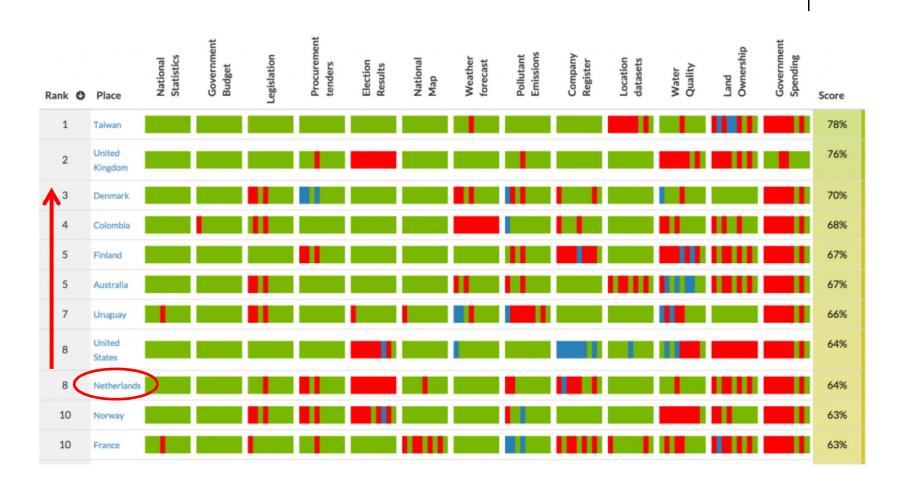

- 1. Open Contact (call first before sending a legal letter)
- 2. Open Approach (show how to reach a decision)
- 3. Open Data (open your data set for (machine readable) reuse)
- 4. Open Spending (show what you do with your money)

World wide Open Data Index

Already a top 10, and now?

Already a top 10, and now?

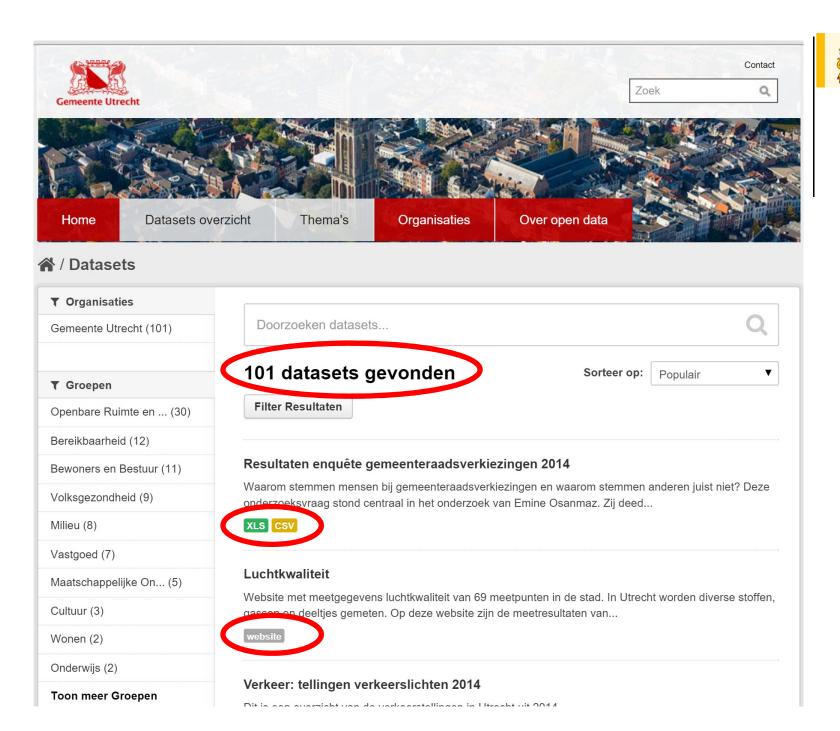

- Data portals
 - data.overheid.nl
 - opendata.utrecht.nl
- The next step for my job "Optimal service at reasonable cost"
 - More datasets
 - Higher quality and more relevant
 - Machine readable, data from the source, no data distribution!!

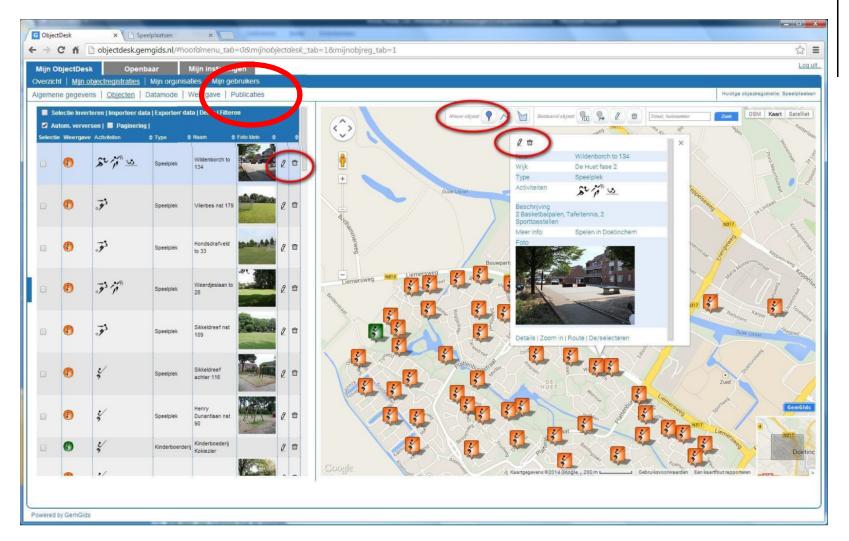

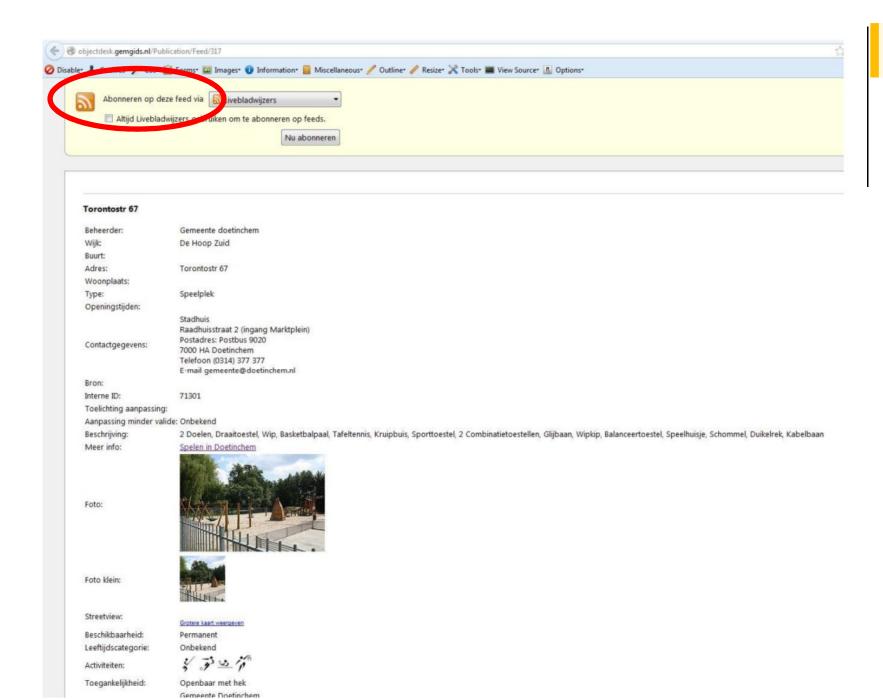

17:00 0-2 jaar 2-10 jaar

LENGTE (cm)

140

Use data from the source...

Buren, participant in the GemGids foundation

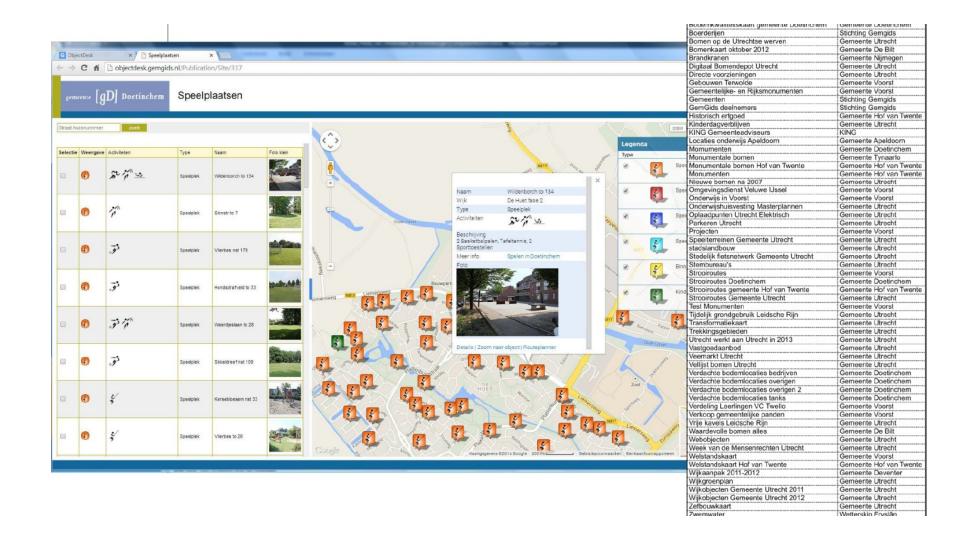

- Open source development of Open Data Tool
 - Easy to create dataset in open source PostGis database
 - Fast way to manage your data on line
 - Direct management of your live datafeeds

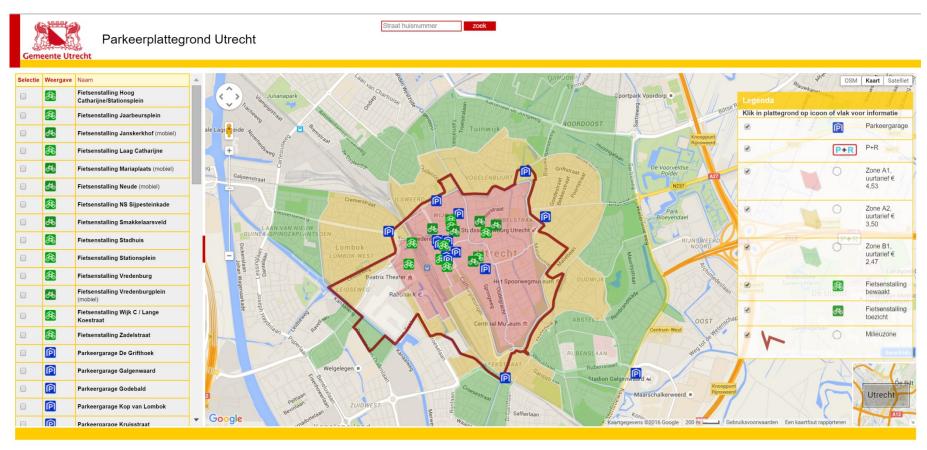

Not only dutch playgrounds

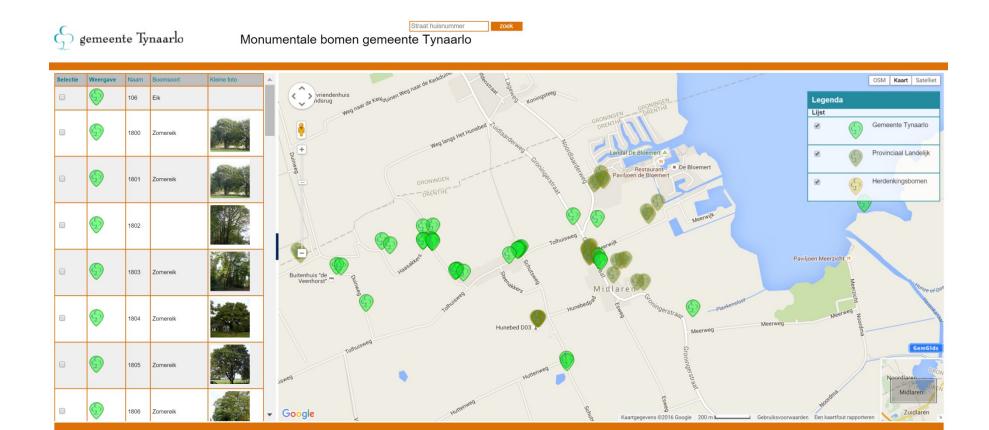

How much do I have to pay for parking my car.

Is it an protected tree I want to cut down

When will they remove the snow?

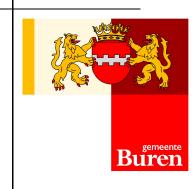

Open government

Optimal service at reasonable cost **Open Your Data!**
